New insulated sleeves prevent short-circuits

No sleeves attached to the tip of test leads?
DANGER of short-circuit accident!!

With sleeve attached to the tip of test leads,
short-circuit accidents can be prevented.

**Conforms to safety standard
IEC61010-031 (revised) for hand-held probes**

What are the new and additional requirements of the international safety standards?

1. "Exposed metal part must be 4mm or shorter" (Previously, 19mm max.) for CAT III and IV environments to prevent short-circuits from occurring.
2. Double-coating with different colors enables you to identify the wear condition of the test leads. (Previously, single-coated)

Accessories : TEST LEAD L9208/ L9207-10/ L9207-30

Sleeve attached	CAT IV 600V	When the CAT (measurement category) rating of the main unit is lower than that of test leads, the CAT of the main unit takes precedence. When measuring in a CAT IV or CAT III environment, be sure to attach the sleeve to the test leads.
	CAT III 1000V	
No sleeve attached	CAT II 1000V	

Sleeve attached

CAT III, CAT IV

No sleeve attached

CAT I, CAT II

Sleeve

included as a standard accessory
(This sleeve cannot be attached to previous products)

Detachable!

When a sleeve is not attached, the test leads can only be used in a CAT II environment.

Pocket size CLAMP SERIES

AC CLAMP METER

3280-10F 3280-20F

Rugged & Compact

- 3280-10F: MEAN Value / 3280-20F: True RMS
- AC 1000 A clamp aperture: 33 mm dia.
- Slim body allows easy clamping even for narrow conductors
- Expanded -25 °C to 65 °C operating temperature range
- Connect the CT6280 flexible sensor to measure up to 4199 A in thick or paired wires

Order Code

3280-10F (MEAN value)	The 3280-70F and 3280-90F includes both the meter and an AC Flexible Current Sensor. 1: AC CLAMP METER 3280-10F×1 (3280-70F) or 3280-20F×1 (3280-90F) 2: AC FLEXIBLE CURRENT SENSOR CT6280×1 3: CARRYING CASE C0205×1

CLAMP ON AC/DC HiTESTER

3287 3288

Compact & easy, one-touch maintenance on all types of AC/DC equipment

- New Model 3288-20 True RMS AC/DC pocket clamp meter measuring up to 1000 A further expands the HIOKI lineup
- The 3287 can handle even cogenerator / inverter energy-saving equipment (10/ 100A)
- Use the 3288 for high current measurements such as UPS emergency batteries and train motors (100/ 1000A)
- A slim core of only 10 mm (0.39") for easy clamping even in crowded wiring

True RMS
3287/ 3288-20

True RMS vs. MEAN Value

Two ways to convert alternating current to RMS are "true RMS response" and "average rectified RMS response" (averaging). Both display the same value for a sine wave, but can display very different values for distorted waveforms.

When measuring current waveforms distorted by inverters...

True
RMS

AUTO
~ 8.56 A

High-frequency waveform components are included in the calculated RMS display value.

MEAN
Value

AUTO
~ 7.35 A

The measured waveform is treated as a single-frequency (undistorted) sine wave, and the calculated average of the AC signal is converted to an RMS display value. Measurement error increases with waveform distortion.

- As inverters and switching power supplies proliferate, the need for the capability to measure distorted current waveforms grows.

A true RMS clamp-on current meter is the proper tool for accurate measurements.

HIGH PERFORMANCE CLAMP SERIES

AC/ DC CLAMP METER

CM4371 CM4372 CM4373 CM4374

Rugged clamp meters for the toughest situations

- CM4371, CM4372: 600 Arms, clamp aperture: 33 mm dia.
- CM4373, CM4374: 2000 Arms, clamp aperture: 55 mm dia.
- The CM4372 and CM4374 will be able to send measured values to a smart phone or tablet using Bluetooth® wireless technology
- Multiple measurement functions
- Expanded -25 °C to 65 °C operating temperature range
- IP54 dustproof and waterproof enclosure

*Jaws (current sensor portion): IP50

Inrush (Rush current)

The CM4370 series can simultaneously measure inrush current in RMS as well as maximum crest values at motor startup and for welding currents. The clamp meters automatically detect the duration of the inrush current (which can range from several dozen milliseconds to several hundred milliseconds).

Automatic AC/DC detection

Simply rotate the rotary switch to the CURRENT MEASUREMENT or VOLTAGE MEASUREMENT function to take measurements after automatically detecting whether the signal is AC or DC. Since this functionality eliminates the need to operate the rotary switch in locations where AC and DC wires are intermingled, it helps boost work efficiency.

AUTO HOLD

The clamp meters beep when the measured value stabilizes and then automatically hold the display value. This is useful when using the instrument in locations where it is difficult to see the display or press the hold button.

Making measurement more intelligent

The instruments listed below will be able to wirelessly send measured values to a smartphone or tablet using Bluetooth® wireless technology, enabling you to display measured values and waveforms in real time. (CM4372, CM4374)

CM4372, CM4374

Damage-resistant jaws

A new and improved design features stronger jaws (the current sensor portion of the instrument) and a dramatic boost in the duration of the warranty from 10,000 to 30,000 open-close cycles to ensure the instrument will provide even more years of reliable use.

Dustproof and waterproof IP54

*Jaws (current sensor portion): IP50

Rotary switch that can be turned with a single hand

Remain alert to hazards

When the clamp meter detects excessively high input or a short-circuit during a continuity check, it alerts you with a red backlight and beeping tone in order to help prevent accidents.

1700 V DC

The CM4370 Series can measure DC voltages of up to 1700 V, making them ideal for no-load voltage inspections of rapidly evolving solar power systems.

CLAMP ON AC/DC HiTESTER 3284 3285

Analysis for DC to distorted waves

- 3284: 200 Arms, clamp aperture: 33 mm dia.
- 3285: 2000 Arms, clamp aperture: 55 mm dia.
- Inrush current peak value
- RMS value of full-wave rectified waveforms
- Waveform and harmonic analysis

RMS value of **full-wave rectified waveforms**

The AC+DC mode enables measurement of the RMS value of full- or half-wave rectified waveforms used in electrical machinery.

Easily monitor current fluctuations

Using the external output functions of the 3284 or 3285 in combination with a HIOKI Memory HiCorder enables recording of current and frequency fluctuations and recording and harmonic analysis of instantaneous waveforms.

CLAMP ON LEAK HiTESTER 3283

1mA to 200A AC Leakage Current Clamp Meter with 10 μ A Resolution to Analyze Distorted Waveforms

- Measure leak current using highly sensitive 10 μ A resolution (at 10.00 mA range)
- Indicate 50/60 Hz leak current components with the filtering function
- Monitor leak current conditions in combination with a Memory HiCorder (monitor output, Model 3283 only)
- 3283-20: EN 61010-2-032:2012 Type A to measure uninsulated hazardous live conductors such as busbars

Filtering

Sharp Low-pass filter reduces harmonic currents.

Output signal 3283 only

Easily monitor leakage current fluctuations

In combination with a HIOKI Memory HiCorder the 3283 can be used for long-term monitoring for leakage current fluctuations.

AC ADAPTER (for USA) 9445-02
AC ADAPTER (for EU) 9445-03
CLAMP ON ADAPTER 9290-10
OUTPUT CORD L9094
(Connect to Banana terminal)
OUTPUT CORD L9095
(Connect to BNC terminal)
OUTPUT CORD L9096
(Connect to terminal block)

Power Measuring

AC CLAMP POWER METER

CM3286

Quickly Check Current, Voltage, Power, and Power Factor

- Display four parameters simultaneously
- A handheld power meter that measures from 5 W of power and 60 mA of current Measure power ranging from 5 W at a low current of 60 mA to 360 kW
- In addition to current, voltage, and power, measure simple integral power consumption and phase sequence
- Features and functions deliver fast and efficient testing
- Hold measured values to send them to a smartphone, quick and easy data recording (CM3286-01 only)

True RMS

CM3286-01

■ Basic specifications (Accuracy guaranteed for 1 year, Post-adjustment accuracy guaranteed for 1 year)

Measurement line		Single-phase, Three-phase (should be balanced and no distortion)
Max. rated voltage to earth		600 Vrms (CAT IV), 1000 Vrms (CAT III)
AC voltage (Frequency characteristics)		80.0 V to 600.0 V, Single range (45 Hz to 1 kHz)
Basic accuracy		45 to 66 Hz: $\pm 0.7\% \text{rdg} \pm 3 \text{dgt.}$
AC current (Frequency characteristics)		0.060 A to 600.0 A, 3 range (45 Hz to 1 kHz)
Basic accuracy		45 to 66 Hz: $\pm 1.3\% \text{rdg} \pm 3 \text{dgt.}$
Power	Single phase	0.005 kW to 360.0 kW
	Accuracy	$\pm 2.0\% \text{rdg} \pm 7 \text{dgt.}$ (50/60 Hz, Power factor = 1)
	Balanced three phase	0.020 kW to 623.5 kW
	Accuracy	$\pm 3.0\% \text{rdg} \pm 10 \text{dgt.}$ (50/60 Hz, Power factor = 1)
Measurement items		Voltage, Current, Voltage/ current peak, Active/ reactive/ apparent power, Power factor, Phase angle ^{*1} , Frequency, Simple Active Energy Consumption (Single-phase) [CM3286-01 only ^{*2}] Voltage/ current harmonic levels
Harmonic (CM3286-01 only ^{*2})		Voltage/ current harmonic levels up to 30th, Content factor, Total harmonic distortion ratio
Other functions		PEAK, Phase detection, Max/ Min/ AVG value display, Auto hold, electric meter comparison, unbalanced 3-phase power estimate display, etc
Dustproof and waterproof ^{*3}		IP54 (EN60529) Grip, excluding lever
Bluetooth® (CM3286-01 only)		Supports devices: iOS10 or later, Android™ 4.3 or later smartphone/ tablet, Interface: Bluetooth® 4.0 LE, Communication distance: 10 m (line of sight)
Power supply		LR03 Alkaline battery ×2
Continuous operating time		25 hours
Dimensions and mass		82 mm (3.23in) W × 241 mm (9.49in) H × 37 mm (1.46in) D, 450 g (15.9 oz)

^{*1} Phase angle obtained from zero cross of current / voltage.

^{*2} Harmonic can be displayed by dedicated application software (Gennect Cross). iOS support scheduled for 2018.

^{*3} Although CM3286 is designed to resist the ingress of dust and dripping water, it is not entirely waterproof or dustproof. Therefore, to prevent an electric shock, do not use it in a wet or dusty environment.

⚠ WARNING Inspect the unit and check that it is operating correctly before use. When carrying out measurement on live lines, wear proper protective gear, insulating rubber gloves, insulating rubber boots and safety helmet, and use extreme caution to avoid electric shock accidents.

⚠ DANGER In order to prevent short-circuits and injury, use the clamp product on electrical circuits with a voltage less than the maximum operation circuit voltage.

Discover electricity theft

Uncover tampering of electric meters by comparing electrical energy measurements

Discover direct theft by measuring current

Discover manipulation of electric meters by comparing meter and integral power consumption measurements.

Discover theft by measuring leakage current.
