WARRANTY STATEMENT

Products sold by Tabor Electronics Ltd. are warranted to be free from defects in workmanship or materials. Tabor Electronics Ltd. will, at its option, either repair or replace any hardware products which prove to be defective during the warranty period. You are a valued customer. Our mission is to make any necessary repairs in a reliable and timely manner.

Duration of Warranty

The warranty period for this Tabor Electronics Ltd. hardware is one year, except software and firmware products designed for use with Tabor Electronics Ltd. Hardware is warranted not to fail to execute its programming instructions due to defect in materials or workmanship for a period of ninety (90) days from the date of delivery to the initial end user.

Return of Product

Authorization is required from Tabor Electronics before you send us your product for service or calibration. Call your nearest Tabor Electronics support facility. A list is located on the last page of this manual. If you are unsure where to call, contact Tabor Electronics Ltd. Tel Hanan, Israel at 972-4-821-3393 or via fax at 972-4-821-3388. We can be reached at: support@tabor.co.il

Limitation of Warranty

Tabor Electronics Ltd. shall be released from all obligations under this warranty in the event repairs or modifications are made by persons other than authorized Tabor Electronics service personnel or without the written consent of Tabor Electronics.

Tabor Electronics Ltd. expressly disclaims any liability to its customers, dealers and representatives and to users of its product, and to any other person or persons, for special or consequential damages of any kind and from any cause whatsoever arising out of or in any way connected with the manufacture, sale, handling, repair, maintenance, replacement or use of said products.

Representations and warranties made by any person including dealers and representatives of Tabor Electronics Ltd., which are inconsistent or in conflict with the terms of this warranty (including but not limited to the limitations of the liability of Tabor Electronics Ltd. as set forth above), shall not be binding upon Tabor Electronics Ltd. unless reduced to writing and approved by an officer of Tabor Electronics Ltd.

This document may contain flaws, omissions or typesetting errors. No warranty is granted nor liability assumed in relation thereto. The information contained herein is periodically updated and changes will be incorporated into subsequent editions. If you have encountered an error, please notify us at support@taborelec.com. All specifications are subject to change without prior notice.

Except as stated above, Tabor Electronics Ltd. makes no warranty, express or implied (either in fact or by operation of law), statutory or otherwise; and except to the extent stated above, Tabor Electronics Ltd. shall have no liability under any warranty, express or implied (either in fact or by operation of law), statutory or otherwise.

PROPRIETARY NOTICE

This document and the technical data herein disclosed, are proprietary to Tabor Electronics, and shall not, without express written permission of Tabor Electronics, be used, in whole or in part to solicit quotations from a competitive source or used for manufacture by anyone other than Tabor Electronics. The information herein has been developed at private expense, and may only be used for operation and maintenance reference purposes or for purposes of engineering evaluation and incorporation into technical specifications and other documents, which specify procurement of products from Tabor Electronics.

1 General

1.1 Scope

The scope of this manual is to describe the setup and operating procedures of the Lucid Series RF Analog Signal Generator. The manual covers the following models listed in the below ordering information.

Table 1.1 Ordering Information

Model	Description
LS3081R	3GHz 1CH rack-mounted Analog Signal Generator
LS3082R	3GHz 2CH rack-mounted Analog Signal Generator
LS3084R	3GHz 4CH rack-mounted Analog Signal Generator
LS30816R	3GHz 16CH rack-mounted Analog Signal Generator
LS6081R	6GHz 1CH rack-mounted Analog Signal Generator
LS6082R	6GHz 2CH rack-mounted Analog Signal Generator
LS6084R	6GHz 4CH rack-mounted Analog Signal Generator
LS60816R	6GHz 16CH rack-mounted Analog Signal Generator
LS1291R	12GHz 1CH rack-mounted Analog Signal Generator
LS1292R	12GHz 2CH rack-mounted Analog Signal Generator
LS1294R	12GHz 4CH rack-mounted Analog Signal Generator
LS12916R	12GHz 16CH rack-mounted Analog Signal Generator
Options	
Pulse	Pulse Modulation
FS	Fast Switching option 100us
SD	Removable SD memory card
W-Rack	Rack mount kit
Emulator pack	Emulator for Keysight, R&S, Anapico, and Holzworth

1.2 Software Support

The **Lucid Control Panel** is a software package that comes on a CD supplied with the device. It enables full control and programming of your Tabor Electronics Lucid series RF analog signal generators via a user-friendly graphical user interface. The **TE Update Tool** is a utility for updating the Lucid device FPGA. The **Lucid Programming Manual** lists and describes the set of SCPI-compatible (Standard Commands for Programmable Instruments) remote commands used to operate the Lucid devices.

The programs and the user manuals can be downloaded from the Tabor Electronics website at <http://www.taborelec.com/downloads>.

1.3 Document Conventions

Convention	Description	Example
Bold Writing	Indicates an item/message in the User Interface.	Click the On button.
<Angled and Bolded Brackets>	Indicates a physical key on the keyboard.	Press <Ctrl>+.
Caution! A Caution indicates instructions, which, if not followed, may result in damage to the equipment or to the loss of data.		
Note A Note provides additional information to help obtain optimal equipment performance.		
Idea An Idea provides an alternate procedure to obtain the same results.		

1.4 Safety

To avoid Electrical Shock, fire or personal injury:

- Use only the proper power cord and certified for the country of use.
- This product is grounded through the grounding conductor of the power cord. To avoid electrical shock, the grounding conductor must be connected to the ground. Before connecting to the power input or output, ensure that the product is properly grounded.
- Do not operate this product with removed covers or panels.
- Observe all the ratings and markings on the product. Search this manual for further rating information, before connecting to it. Do not apply potential that is higher than the maximum rating.
- Do not operate in dark or wet conditions.
- Do not operate in an explosive environment. Keep product clean and dry.

1.5 Maintenance

1.5.1 Preventive Maintenance

There are no hardware adjustments within Lucid Generators. Tabor Electronics Ltd., recommends that the Lucid Generator is calibrated every 12 months or whenever a problem is suspected. The specific calibration interval depends upon the accuracy required. No periodic preventive maintenance is required.

1.5.2 Long Term Storage or Repackaging For Shipment

If the instrument is to be stored for a long period of time or shipped immediately, proceed as directed below. If you have any questions, contact your local Tabor Electronics representative or the Tabor Electronics Customer Service Department.

1. Repack the instrument using the wrappings, packing material and accessories originally shipped with the unit. If the original container is not available, purchase replacement materials.
2. Be sure the carton is well sealed with strong tape or metal straps.
3. Mark the carton with the model and serial number. If it is to be shipped, show sending and return address on two sides of the box.

If the instrument is to be shipped for service or repair, the following information must be included with the shipment:

- ◆ Name and address of the owner.
- ◆ Record the model and serial number of the instrument, options, and firmware version.
- ◆ Note the problem and symptoms – detailed information will help in verifying the problem
 - What was the instrument setup?
 - Did the unit work; then fail?
 - What other equipment was connected to the generator when the problem occurred?
- The name and telephone number of someone familiar with the problem who can be contacted by Tabor Electronics if any further information is required.
- Show the returned authorization order number (RMA) as well as the date and method of shipment.

Note

Always obtain a return authorization number from the factory before shipping the instrument to Tabor Electronics.

2 Introduction

The Lucid Series Rackmount platform is designed to offer maximum channel density at minimum cost of space. The rack-mounted platform, offers up to 4 phase coherent channels in a 19" 1U box and up to 16 phase coherent channels in a 3U, 19" box. It provides extremely fast switching speed, superior signal integrity and purity, a removable memory card for maximum security, all the necessary modulated signals for analog communication systems, and with built in LAN and USB interfaces. The Lucid Series is designed to meet today's most demanding specifications that is needed from the R&D benches to the production lines.

2.1 Unpacking

Check that the packaging is undamaged. If packaging is damaged, notify the carrier immediately. The Lucid benchtop model instrument is supplied with:

- Power cord with a plug according to customer country standard.
- USB cable for connecting a control PC to the instrument.
- CD with Lucid software, user manual and instrument drivers.

Caution!

The Lucid Series RF Signal Generator ships in an antistatic package to prevent damage from electrostatic discharge (ESD). When storing the unit, use the antistatic case.

2.2 Front Panel

Figure 2.1 LS6084R4 Front Panel

- **Power Button**  – Turn on or off the device.
- **SD CARD** – Removable SD card for instrument security. It is used for storing all data about used frequencies for PATTERN in the Modulation, the List, and System tabs.
 - ♦ Min capacity 4GB
 - ♦ Max capacity 16GB
 - ♦ Speed grade 10
 - ♦ Can be used with SD to micro SD adapter
- **CH1...CH16** - Up to sixteen SMA type connectors for RF signal output.

2.3 Rear Panel

Figure 2.2 Rear Panel for 4 Channels

- **Reference:**
 - ♦ **10/100MHz IN** – BNC type connector for external 10 MHz or 100 MHz signal. This input is normally used for synchronizing system components to a single clock reference.
 - ♦ **10 MHz OUT** – BNC type connector for 10 MHz signal output. The output is used to synchronize other system devices to the Lucid Rack-mount clock reference.
 - ♦ **100 MHz OUT** – BNC type connector for 100 MHz signal output. The output is used to synchronize other system devices to the Lucid Rack-mount clock reference.
- **MODULATION IN** – Up to four BNC type connectors, one for each channel, for an input from an external amplitude modulation source.
- **TRIGGER IN** – Up to four BNC type connectors, one for each channel, for an input from an external trigger source.
- **LAN + USB HOST** –
 - ♦ **RJ45** – 100BaseT Ethernet connector for connecting a control PC via the LAN.
 - ♦ **USB Type A** – USB 2 Type A interface for connecting a USB device such as a memory device for storing and recalling instrument setups, keyboard or mouse.
- **USB DEVICE** – USB 2 Type B connector for connecting a control PC.
- **POWER FUSE T6.3A/250V** – Fuse glass 6.3 A 250 VAC 5X20 mm Slo-Blo.
- **AC Power Socket**– 3 Pins IEC320 C14 Inlet Power Plug Socket.

Note

The Lucid generator will automatically revert to external reference when a signal is detected at its input.

3 Troubleshooting

3.1 Manually Installing Instrument Drivers

3.1.1 USB Device Driver Manual Installation (Windows 10)

1. Download the latest Lucid series USB device driver from www.taborelec.com/downloads.
1. Using the supplied USB cable, connect the Lucid benchtop model to the PC.
2. Open the **Start** menu, and in the search field, type **Device Manager**.

3. In the search results list, select **Device Manager**.
The **Device Manager** window opens.

4. In the navigation tree, expand **Other devices** and double click on **CP2130 USB-to-SPI Bridge**.

5. The **CP2130 USB-to-SPI Bridge Properties** window opens.
Click **Update Driver**.

6. In the **Update Drivers - CP2130 USB-to-SPI Bridge** window, select **Browse my computer for driver software**.

7. Browse to the driver software location on PC, select its folder and click **OK**.

8. Driver download begins.

9. After the download is complete, the driver installation begins.

10. After the installation is complete, the following success message is displayed:

11. Click Close to close the Update Drivers window and to proceed.

12. In the **CP2130 USB-to-SPI Bridge Properties** window the displayed device status should be: **The device is working properly.**

3.1.2 USB Device Driver Manual Installation (Windows 7)

1. Download the latest Lucid series USB device driver from the Tabor Electronics Ltd., website. Device drivers are available at www.taborelec.com/downloads
2. Connect the Lucid Generator to the PC using the supplied USB Cable.

The **Installing Device Driver Software** message is displayed at the lower-right part of the screen.

3. Wait for the following messages to appear:

4. Click **Close**.
5. Open the **Start** menu, and in the search field, type **Device Manager**.
6. In the search results list, select **Device Manager**. The **Device Manager** window opens.
7. In the navigation tree, expand **Other devices** and select **CP2130 USB-to-SPI Bridge**.

8. In the **Update Drivers - CP2130 USB-to-SPI Bridge** window, select **Browse my computer for driver software**.

9. Browse to the driver software location on PC, select the folder and click **Next**. Driver installation begins.

10. After the driver software installation is complete, click **Close**.

11. In the Device Manager, under Silicon Labs USB Devices, click **Silicon Labs CP2130 USB to SPI Bridge**.

12. In the **CP2130 USB-to-SPI Bridge Properties** window the device status should indicate the device is working properly.
