

PM9096/201 Secondary Ignition Pickup 1000:1

For Fluke 98 AUTO ScopeMeter, 123, 90 and 190 series ScopeMeters

The PM9096/201 is a capacitive Secondary Pickup to enable secondary ignition testing. When clamped to a spark lead, the pickup measures the voltage generated by the ignition system and adapts the signal for optimal display on the Fluke test tool.

Attenuation: 1000x (@ 1 Mohm // 25 pF)

Cable Length 3 m

Cable Silicon insulated with BNC connector.

Suitable spark plug lead diameter 6 to 8 mm

BB120 Shielded Banana to BNC Adapter is required to adapt to ScopeMeter 120 Series shielded banana jack inputs.
