* *

Product: Tektronix AFG3000C Series Arbitrary/Function Generator
Version: 1.0.10
Last Revised: Feb 13,2017

Contents of these release notes:

- 1) Description
- 2) Target Instruments
- 3) Firmware Compatibility
- 4) Contacting Tektronix

* Description *

Tektronix' AFG3000C Series of arbitrary/function generators (AFG) consists of 9 models whose performance establishes a new benchmark in the "value" category. AFG3011C AFG3021C AFG3022C AFG3051C AFG3052C AFG3101C AFG3102C AFG3151C AFG3152C AFG3251C AFG3252C.

* Target instruments *

This firmware runs on the following instruments:

AFG3011C AFG3021C AFG3022C AFG3051C AFG3052C AFG3101C AFG3102C AFG3151C AFG3152C AFG3251C AFG3252C.

* Firmware Compatibility *

This firmware is not compatible with AFG3000 and AFG2000 Series instruments. It can only be used in AFG3000C Series.

No calibrations are required after installing this firmware update.

* What's new in this version *
1.0.10:

1. Enhance the stability of configuration file
2. Add "External Add Input" for AFG3051C/AFG3052C

* What's new in this version *

1.0.9:

1. Add new models: AFG3151C AFG3152C
2. Optimize waveform performance in burst mode.
